EVERYTHING YOU NEED TO KNOW TO GET STARTED

PARCS

LTD.

PARCS Customer Portal

Custom tracking and ordering software

Over the past three decades of business development and growth, the Liftsafe Group of Companies has always looked for new strategies to improve how our clients are able to operate efficiently. In 2015, we saw a need to provide our customers with a secure online system to allow our clients to schedule and keep track of their inspections and repairs, while eliminating the need for paper records. We invested time and resources in creating a custom software system to improve our customer’s experience while saving them time and money.

Is it time to take your inspections and repairs online?

The contents of this handbook will help you determine your documentation and compliance framework and serve as an instructional guide for using our online platform.

Signs you need the PARCS Customer Portal

Here are some signs it may be time to upgrade from paper records and start managing your inspections and repairs more efficiently.

No single source of information

If you find yourself organizing and managing multiple installations, inspections and repairs for your facility, PARCS can provide the solution. Not only are we a single source for all your facility needs, but you can book, set reminders and house documents all in one online system.

Lost time when booking

Don't waste hours trying to source, contact, request quotes and book your inspections and repairs for multiple pieces of equipment. You can easily book online with our customer portal, and once in the system, automatic reminders can be set for upcoming inspections so your equipment will always stay safety compliant.

Reports are hard to share

We understand that paperwork can be a nightmare, and keeping track of years worth of inspection and repair documentation only adds to the clutter. Keep everything housed online in our secure portal database, where you can view, update, store, download and share your files.

Potential data loss with no backup

Find yourself needing to provide proof of inspection ASAP with no record in sight? Our system will keep your documents secure and allow for easy access to information. Organize your data based on date, equipment type, etc.

There is no tracking

Multiple pieces of equipment, in multiple locations, serviced internally and externally can be difficult to track. Allowing our software to take the load off your shoulders could be an ideal solution with documentation that is only a few clicks away.

Compliance reminders

Wish that you could set the alarm for your next inspection deadline? That is precisely what our customer portal will deliver. Customize your online reminders to keep track of when upcoming inspections are due and set reminders based on your needs.

All of your reports in the palm of your hand

Your customer portal can be with you, anytime, anywhere.

The PARCS Customer Portal has been updated to work on both android and IOS devices. That way you can always stay connected, no matter your location. This app will allow you to book an inspection or view your data the moment you need it.

Complementing our existing PARCS Customer Portal, the user-friendly PARCS Mobile App features the ability to view certificates and request service, all from your smart phone.

Scan history

Scan items to see their current status.

View Certificates

Load the certificate in the browser window, which can be easily panned or zoomed on your screen.

Request Service

Automatically populated with your name and email address, your request will be submitted directly to the PARCS team.

What is the PARCS Customer Portal?

At PARCS Ltd., we have simplified how our customers receive their certificates, documents and reports in a timely, efficient and environmentally friendly manner. Our customer portal reporting system is designed to give you 24-hour access to your reports, certificates and inspections. This online tool eliminates the need for paper records and contains a detailed inventory of your equipment.

How can we support?

- Paperless reporting
- Free access for all current customers
- Full summary report of all inspections and orders
- Full access of inspection and equipment records 24/7
- Manage equipment tasks, approvals and automate inspections
- Complete inventory of equipment with documented photos
- Advanced sorting and segmentation functionality
- Advanced data analysis with year to year data
- Available as an app for iOS and Android
- Unlimited document uploads and storage
- Full-service tracking of your equipment
- Review and approve repair quotations
- Real-time updates and notifications
- Complete cost analysis of projects
- Free portal training provided
- Secure access to all files

One stop online solution

Step 1: Track

Sort and track the orders, repairs and inspections of your equipment by date, time and location.

Step 2: Schedule

Schedule multiple equipment inspections and repairs on an immediate and annual basis.

Step 4: Approve

Request changes to quotes and orders at any time.

Step 3: Edit

Approve all outstanding orders and quotes remotely at any time.

Services & Functions

Account Set-Up

Learn how to personalize your account notifications and reset your password.

Customer Portal Login

We identify how to login to the secure customer portal and where to get assistance.

Inventory Tab

We provide you with complete inventory control and authority.

Schedule Tab

Sort and review upcoming and past projects.

Quotes Tab

Identify and approve your outstanding quotes.

Orders Tab

View and approve outstanding orders.

Inspections Tab

View, organize and print all of your inspection data.

Maintenance Tab

View all maintenance documentation and records.

Site Visit Summary

Generate an overview report of the work performed and the status of your equipment.

History Tab

A high-level overview that identifies all work completed within a given time frame.

Documents Tab

Access and upload relevant documents for any piece of equipment.

FAQ

Get your questions answered. Our most frequently asked questions by our current users.

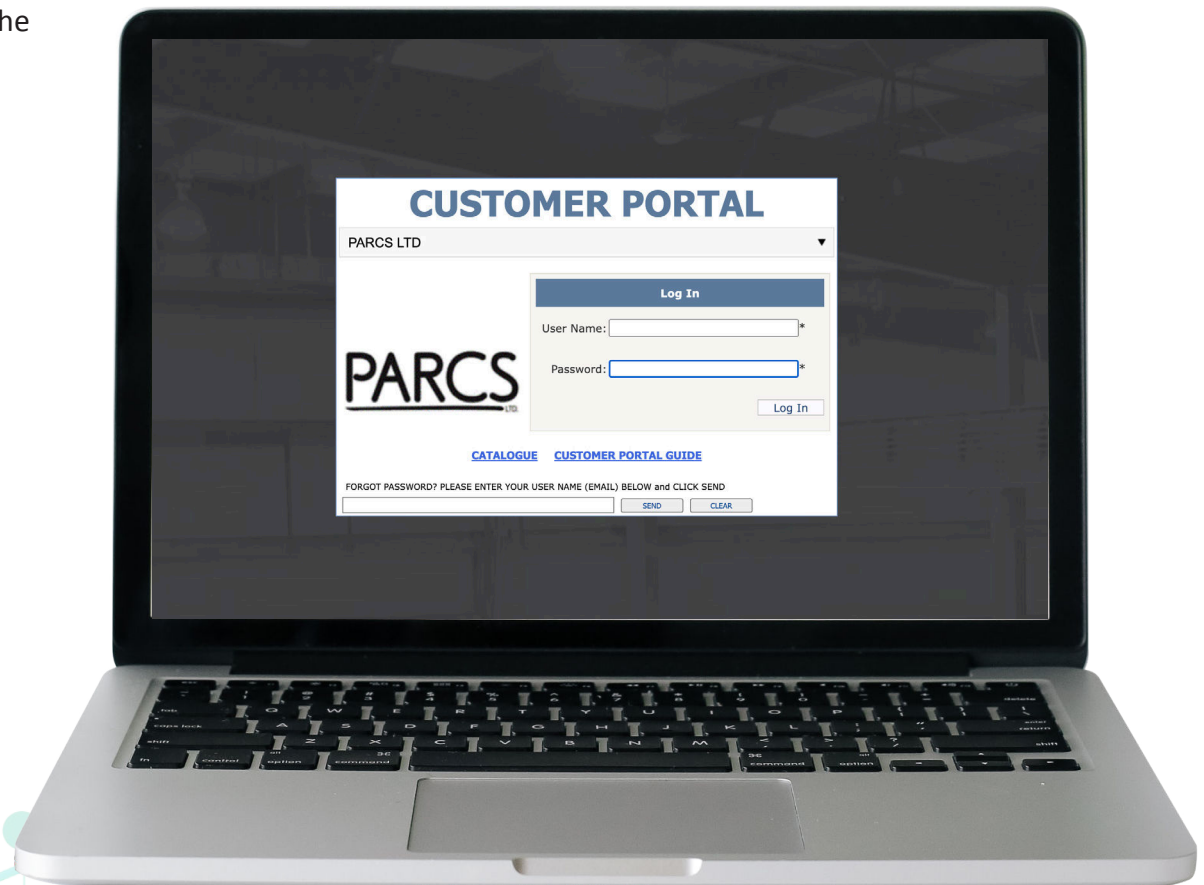

Getting started

As a customer of PARCS, you have access to our Customer Portal and all of your project information.

How to set up an account.

- ① Our dedicated Customer Portal Representatives will get you started by setting up your account details in our system. Your secure login information will be emailed to you automatically. If you have not received this information, please contact us at the contact information below.
- ② You will be sent your username and temporary password.
- ③ We recommend changing your password once you have access. (Page 12)
- ④ Continue to login details. (Page 9)
- ⑤ If you did not receive your username and password, please contact us via one of the following methods.
 - a. Toll Free: 1-866-496-6600
 - b. Phone: 519-571-0003
 - c. Email: parcs.cs@liftsafeinspections.com

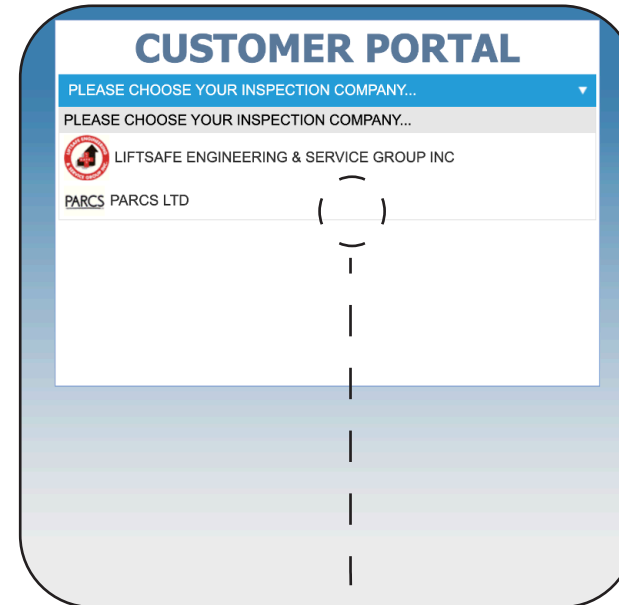

How to login

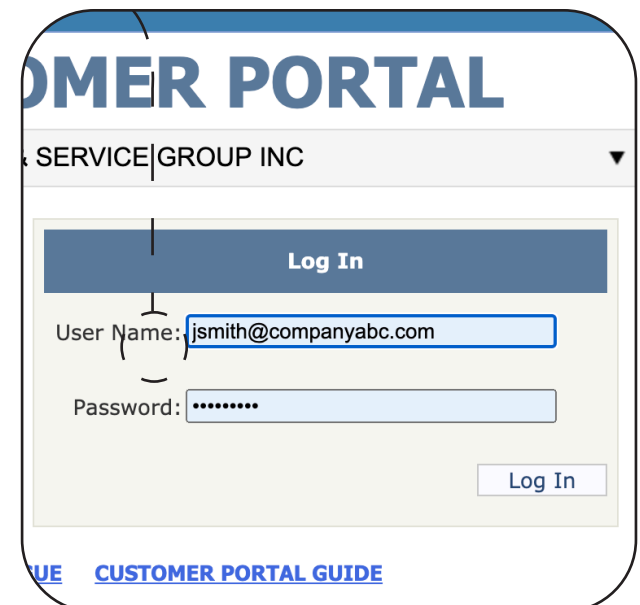

The Customer Portal can be accessed via our website at the bottom of every page. It is recommended that you bookmark the following link for quick and easy access to the portal.

<https://724webs.com/liftsafe/CPortalLogin.aspx>

Once the Customer Portal login page is visible select PARCS LTD from the drop-down menu.

- 1 This login screen can only be accessed by authorized representatives and requires a secure login and password for your protection.
- 2 From the drop-down menu select the company that pertains to your inspections or repairs.
- 3 Enter your user name and password.
- 4 Select the login button.

It is recommended that you keep the login and password confidential to ensure your inspection certificates, documents and quotes are kept safe.

If you are having trouble logging in you can message our team at the bottom left hand corner of the login screen, and a dedicated Customer Portal Representative will provide assistance.

Personalize your account

CUSTOMER PORTAL EMAIL NOTIFICATIONS USER PROFILE

Once logged in, you will notice three main tabs at the top of the page reading: CUSTOMER PORTAL, EMAIL NOTIFICATIONS & USER PROFILE.

EMAIL NOTIFICATIONS

Important: Your email notifications are pre-set to send you reminders for your inspections, and services. You can edit the frequency of notifications using the following instructions.

1 Once you have clicked on the email notifications tab you can select or de-select any of the boxes that do or do not apply to your account.

2 Once satisfied with your notification selections, click save. Not clicking save will cause your updates to be lost when you navigate away from the page.

EMAIL NOTIFICATION OPTIONS

Daily portal notifications

- Number of new quotes posted to your account
- Number of new orders posted to your account
- Number of new inspection certificates posted to your account
- Number of new maintenance forms posted to your account
- Number of new documents posted to your account

Outstanding service quote notifications: Receive outstanding service and repair quote notifications and adjust the frequency of your service reminders. You can customize your notification to daily, weekly, monthly, quarterly, semi-annually and yearly.

Note: This is a highly recommended notification to ensure you stay up to date with your repairs and inspections.

Outstanding inspection quotes notification: Receive outstanding inspection quote notifications and adjust the frequency of inspection reminders. You can customize your notification to daily, weekly, monthly, quarterly, semi-annually and yearly.

Inspection month notification: This section allows you to determine when you wish to receive a reminder that a technician will be visiting your facility. This can be set up as a daily, weekly, monthly, quarterly, semi-annually or yearly reminder.

Site visit notification: These email alerts provide you with a notification when the site visit summary is available to be reviewed. It is a one-time notification when the work order is completed.

Overdue inspection alert notification: Receive this notification when your equipment inspection is past due. Reminders for overdue inspections can also be set up as a daily, weekly, monthly, quarterly, semi-annually and yearly notification, and you can set an automatic end to these notifications.

Note: This is a highly recommended notification to ensure you stay up to date on your equipment inspections to meet all regulations.

Not-safe equipment notification: Reminders for not-safe equipment notifications can be set up as a daily, weekly, monthly, quarterly, semi-annually and yearly alert, and you can set an automatic end to these notifications.

Outstanding Service quote notifications:

Receive outstanding service and repair quote notifications and adjust the frequency of your service reminders.

CUSTOMER PORTAL EMAIL NOTIFICATIONS USER PROFILE

MAXIMUM OF ONE EMAIL PER DAY WILL BE GENERATED WITH THE APPLICABLE NOTIFICATIONS

Customer portal home page

The CUSTOMER PORTAL tab is where you will find all of your inspection and service data. This document will help you navigate the portals many features and processes.

The following can be viewed on all tabs:

Top right-hand corner

- User information: login name and email is displayed
- Logout: logout of the Customer Portal at any time
- Catalogue: highlights our products and services
- Customer Portal guide: a digital version of the Customer Portal Handbook

Main search bar

Use this search bar for all tabs to narrow your search criteria by location and date.

Important: Please remember to select refresh every time a change has been made to your selection or date range.

Main tab

Within the main tab of the customer portal you will see our welcome messages feature key product offers and promotions.

Navigating the inventory tab

The INVENTORY TAB allows you to view and maintain your inventory/equipment. This is where you will book and control your inventory & inspections. This feature is included with all active Customer Portal accounts.

HOW IT WORKS

1

2

Feb 11, 2021

3

REFRESH

COMPANY ABC

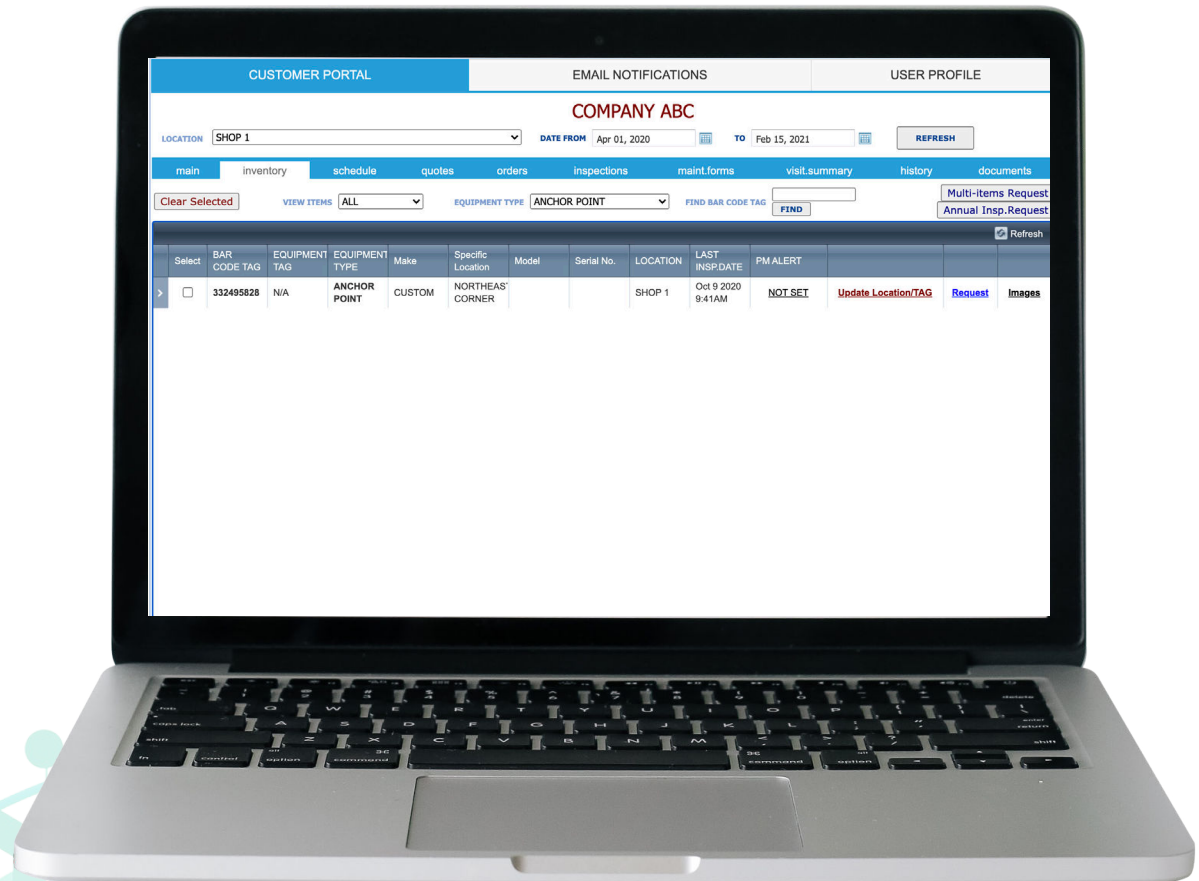

- 1 Select your location.
- 2 Select your targeted date range.
- 3 Select refresh.

Sorting based on location

The location drop-down menu allows you to access specific information on each of your locations if applicable. To select one specific location, select the location from the drop-down menu and click.

Sorting based on date

This field can be adjusted to backdate and receive further information on previous work. By clicking on the calendar, you will be able to select your targeted date range. Once your date range is selected, press the refresh button to update. This function allows you to filter and locate both current and old data.

How do I refine my search?

The screenshot shows a search interface with the following elements:

- LOCATION:** A dropdown menu with "Please choose..." selected.
- DATE FROM:** A date field set to "Feb 01, 2021" with a calendar icon.
- TO:** A date field set to "Feb 15, 2021" with a calendar icon.
- REFRESH:** A button to refresh the search results.
- Navigation Tabs:** main, inventory (selected), schedule, quotes, orders, inspections, maint. forms, visit. summary, history, documents.
- Clear Selected:** A button to clear the current selection.
- VIEW ITEMS:** A dropdown menu with "ALL" selected.
- EQUIPMENT TYPE:** A dropdown menu with "Please choose..." selected.
- FIND BAR CODE TAG:** A text input field.
- FIND:** A button to execute the search.
- Multi-items Request:** A button.
- Annual Insp. Request:** A button.

The **VIEW ITEMS** drop down menu provides the ability to filter by all and past due equipment, to find out which items require immediate attention.

EQUIPMENT TYPE: Specify the equipment type you wish to find. You must either select all or a specific equipment type.

FIND BAR CODE TAG: Search by the bar code tag of your equipment. Find specific equipment quickly.

Important: Clear all search data before starting a new search.

How do I read the data?

The screenshot shows a tool bar for the data table with the following columns:

Select	BAR CODE TAG	EQUIPMEN TAG	EQUIPMEN TYPE	Make	Specific Location	Model	Serial No.	LOCATION	LAST INSP.DATE	PM ALERT
--------	--------------	--------------	---------------	------	-------------------	-------	------------	----------	----------------	----------

Once you have refined your search, your inventory data will display under the tool bar menu. The tool bar is interactive, all search criteria can be sorted to ensure finding your orders is easy and efficient. To verify if a heading is interactive you can simply scroll over the heading. If interactive a message will appear saying "click here to sort".

Tool Bar Includes

Bar Code Tag	Internal certificate number that PARCS provides when tagging equipment.
Equipment Tag	Number for the client's external use when tagging equipment.
Equipment Type	Type of equipment that has been inspected or repaired.
Make	Equipment brand.
Specific Location	Location where the equipment was at the time of inspection within a facility.
Model	Model code for the brand.
Serial No.	Number located on the equipment.
Location	Customers site location.
Last Insp. Date	Date of last inspection performed by our team.
PM Alert	Preventative Maintenance Alert set to a frequency based on needs of equipment (monthly, annually etc.)

How do I perform an annual inspections request? (single item)

- 1 Go to the top right corner and click on the ANNUAL INSP. REQUEST button.
- 2 This will open a pop-up window showing all of your annual inspection items for your location.
- 3 Fill in the form including:
 - a. Equipment: items you wish to have inspected.
 - b. Location: choose from the locations listed.
 - c. Message: include any additional information regarding your request.
- 4 Click the send email button.
- 5 Your request will be confirmed by one of our reps. If you encounter any issues contact us at 1-866-496-6600.

The screenshot shows a web form titled 'ANNUAL REQUEST'. It contains the following fields and elements:

- 1** A button at the top right labeled 'Multi-items Request' and 'Annual Insp.Request'.
- 2** The form title 'ANNUAL REQUEST'.
- 3** The form fields:
 - ITEM ALL ITEMS** (dropdown menu)
 - EQUIPMENT** (text input field)
 - COMPANY** (text input field with value 'THAMES VALLEY DISTRICT SCHOOL BOARD')
 - LOCATION** (dropdown menu with value 'Please choose...')
 - SEND TO NAME** (text input field with value 'PARCS SUPPORT')
 - SEND TO EMAIL** (text input field with value 'parcs@liftsafeinspections.com')
 - CC EMAIL** (text input field)
 - REQUEST** (dropdown menu with value 'REQUEST FOR ANNUAL INSPECTION')
 - MESSAGE** (text input field)
 - REQUESTED BY** (text input field with value 'Zone 1 TVDSB')
- 4** A button labeled 'SEND EMAIL'.
- A button labeled 'RETURN' at the bottom right.

How do I set PM Alerts?

A PREVENTATIVE MAINTENANCE alert, assigns PM frequency relative to each piece of equipment. Remember to set an email alert for your PM schedules to ensure your equipment is always properly maintained.

- 1 Simply go to the column that says PM alert, click on NOT SET. The update item pop-up will open and you can adjust the PM alert frequency before selecting the save button.

AG	EQUIPMENT TAG	EQUIPMENT TYPE	Make	Specific Location	Model	Serial No.	LOCATION	LAST INSP.DATE	PM ALERT
328	N/A	ANCHOR POINT	CUSTOM	NORTHEAST CORNER			SHOP 1	Oct 9 2020 9:41AM	NOT SET

How do I submit a multi-items request?

- 1 Go to the top right corner and select the MULTI-ITEMS REQUEST button. — — — — —
- 2 This will open a pop-up window showing all of your annual inspection items for this location.
- 3 Fill in the form including: — — — — —
 - a. Equipment: items you wish to have inspected.
 - b. Location: choose from the locations listed.
 - c. Request: list options.
 - d. Message: include any additional information regarding your request.
- 4 Click the send email button.
- 5 Your request will be confirmed by one of our reps. If you encounter any issues contact us at 1-866-496-6600.

How do I update my tag locations? (where is my equipment)

- 1 Select update location.
- 2 Pop-up will appear with item and corresponding bar code number.
- 3 Update location from dropdown menu and select save.

	Specific Location	Model	Serial No.	LOCATION	LAST INSP.DATE	PM ALERT	
USTOM	NORTHEAS CORNER			SHOP 1	Oct 9 2020 9:41AM	NOT SET	Update Location/TAG

How do I remove inventory items?

Select the location, date and click refresh (remember you must always press refresh when you are adjusting date ranges and locations).

Select	BAR CODE TAG	EQUIPMENT TAG	EQUIPMENT TYPE	Make	Specific Location	Model	Serial No.	LOCATION	LAST INSP.DATE	PM ALERT		
<input checked="" type="checkbox"/>	495828	N/A	ANCHOR POINT	CUSTOM	NORTHEAST CORNER			SHOP 1	Oct 9 2020 9:41AM	NOT SET	Update Location/TAG	Request

1 Select the inventory item you wish to remove (select using the check box at the left hand side of the toolbar).

2 Click the request link in the tool bar.

3 The notification request pop-up will appear. Select REMOVE FROM INVENTORY from the request drop down menu.

4 Click the send email button.

The inspections tool bar is interactive, all search criteria can be sorted to ensure finding your inspections is easy and efficient. For example, clicking the status heading will enable you to sort by various statuses such as safe or not safe. Please note it is possible to sort based on multiple criteria such as type and status.

Tool bar includes:

- Certificate:** All certificates pertaining to your inspection can be found under the certificate heading. Clicking on any of the specific certificates will generate a PDF that can be printed or saved. All inspection points are documented and contain comments and appropriate statuses based on the inspection performed.
- Def Photos:** Should there be any deficiencies with any of your inspection items, a detailed list with photos will be found here. Once you click on any of the listed deficiencies a PDF will generate which can be saved or printed.
- Date:** The date of your inspection can be found here and can be used to sort your data by date.
- Status:** This column allows you to quickly view the status of your items that were inspected. By sorting this you can quickly see which of your equipment requires action or which of your items are safe.
- Type:** This column provides you with the ability to filter based on equipment type. For example, if you are looking to view all basketball inspections, click the heading to filter.
- Tag id:** The tag id is our internal records number to keep track of maintenance performed.
- Equip id:** The equipment id is the clients external reference number for equipment (if provided) to allow for easy search and tracking.
- Ship to:** Location the equipment is sent to for maintenance or repairs.
- Notes:** Notes made by our technicians when inspecting equipment.

Accessing your certificates

Be sure to select location, date and click refresh (remember you must always click refresh when you are adjusting date ranges and locations).

- 1 Click on the certificate number found on the far left column. A pop-up with a link to the certificate will generate.

Understanding your certificate

Each certificate has a uniform layout.

- 1 At the top you will find the certificate number, equipment ID, and the sales order number.
- 2 You will then see all of the relevant data we have for that particular item including location, size, material, and more.
- 3 In the middle of the page, you will see the various inspection points we look at when we inspect your equipment. Some inspection points don't always apply to a given item. Having this breakdown allows you to see what areas of the item passed / failed with either a check mark or X in the status column.
- 4 There is also an additional column where technicians can put comments and a hazard class which are defined at the bottom of the certificate.
- 5 Above the hazard class icon legend, an overall item status will be displayed indicating if the item is "Safe" or "Not Safe." This section will include an image of the item inspected and the name of the technician who inspected the equipment, in the event you have additional questions.

How do I generate a pdf?

Follow these steps to generate a pdf of your inspection certificate, which can be saved or printed if you require. Be sure to select location, date and click refresh (remember you must always press refresh when you are adjusting date ranges and locations).

- 1 Click on any of the work order numbers to the left. A pop-up will open.
- 2 Click the document link in the center of the pop-up and the pdf will generate in a new window. This PDF will detail the work that has been completed, the status of the work and the time it took to complete the repairs.

20-WS.11141	Oct 15, 2020
20-WRC.880821	Oct 15, 2020
20-WRF.111471	Oct 15, 2020

How do I merge a pdf?

PDF MERGE allows you to combine all or some of your certificates into one PDF document. Be sure to select location, date and click refresh (remember you must always press refresh when you are adjusting date ranges and locations).

- 1 Click on the PDF MERGE button in the top left corner
- 2 Set location, date and type, then click find.
- 3 Click add on the certificates you would like to add into the PDF.
- 4 When finished adding all the certificates, hit PDF MERGE. This will open a new document which you can save or print.

How to save and print a visit summary page?

As is standard with our software, we have enabled a feature that allows you to save or print a visit summary PDF from within the system.

- 1 Select the visit summary PDF link from the top right corner.
- 2 A PDF will generate in a separate link detailing a full summary of your site visits.
- 3 From here you can download and save or print this PDF file.

Navigating the history tab

The HISTORY TAB is the section of the Customer Portal that gives you access to information about inspections and maintenance forms all within the same screen. In this tab you are able to filter by location as well as certificate number, order number, status or equipment type. This tab allows you to both sort and filter your content, ensuring all required documentation can be located with ease.

FAQ

Frequently asked questions about the PARCS Customer Portal

Q. Why am I getting email notifications?

A. Your email notifications are pre-set to send you reminders for your inspections, and services. You can edit the frequency of notifications using the following instructions. Once you have clicked on the email notifications tab you can select or de-select any of the boxes that do or do not apply to your account.

Once satisfied with your notification selections, click save. Not clicking save will cause your updates to be lost when you navigate away from the page.

Q. How do I reset my password?

A. The USER PROFILE tab is where you can reset your password when you first get access to your account and can be accessed at any time for security changes. Your company information and email on file will be listed. To reset your password:

1. Click on the user profile tab.
2. Type in your existing password.
3. Type in your new password.
4. Retype your new password.
5. Click save.

Q. Where is my reset password email?

A. Have you reset your password but have not received the confirmation email? This email is often sent to your junk box and we recommend checking that before resetting your password again. If the email is still missing please contact us via one of the following methods.

1. Toll Free: 1-866-496-6600
- b. Phone: 519-571-0003
- c. Email: parcs.cs@liftsafeinspections.com

Q. Why can't I find my data?

A. Be sure to select location, date and click refresh (you must always click refresh when you are adjusting date ranges and locations).

The location drop-down menu allows you to access specific information on each location if applicable. The date can be adjusted to backdate and receive further information on previous work. Once your date range is selected, press the refresh button to update.

Q. How do I merge PDFs?

A. When on the INSPECTIONS TAB, PDF MERGE allows you to combine all or some of your certificates into one PDF document.

1. Click on the PDF MERGE button in the top left corner
2. Set location, date and type, then click find.
3. Click add on the certificates you would like to add into the PDF.
4. When finished adding all the certificates, hit PDF MERGE.

Q. What is a PM alert?

A. A PREVENTATIVE MAINTENANCE alert, assigns PM frequency relative to each piece of equipment. Remember to set an alert for your PM schedules to ensure your equipment is always properly maintained.

Q. How do I access my certificates?

A. To access your certificates under the INSPECTIONS TAB, be sure to first search the location and date and click refresh (remember you must always click refresh when you are adjusting date ranges and locations).

Click on the certificate number found on the far left column. A pop-up with a link to the certificate will generate.

Q. How do I set a PM alert?

A. Under the INSPECTIONS TAB simply go to the column that says PM alert, click on Not Set. The update item pop-up will open and you can adjust the PM alert frequency before selecting the save button.

Q. How do I approve/decline/edit an order?

A. Under the ORDERS TAB be sure to select location, date and click refresh. Click on 'select' found on the far right column of any order. A preview of the order will generate. Once you are ready to approve your order, click the approve button at the bottom of the page and the status will update accordingly. To edit your order you will see a customer notes section at the bottom of the PDF preview. You can make any comments or document any questions for us to review before the quote is approved. You must select approve to send edits. Your request will be confirmed by one of our reps. If you encounter any issues contact us at 1-866-496-6600.

Q. How do I submit a multi-items request?

A. Under the INVENTORY TAB go to the top right corner and select the Multi-items Request button. This will open a pop-up window showing all of your annual inspection items for this location. Fill in the form and click send.
